WHAT'S NEW IN :APOGEE WEBAPPROVAL

HERE IS ANOTHER TASTE OF WHAT IS NEW IN WEBAPPROVAL...

User Roles

☐  Administrator

☒  Uploader

☐  Approver

WebApproval 

☒ Send e-mail

  Event

☐ ☐ First pages ready to inspect

☐ ☐ All pages ready to inspect

☒ ☐ All pages approved

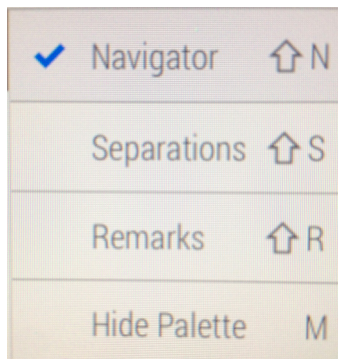

☐ ☐ Page rejection

☒ ☐ Invitation to upload

:INDIVIDUAL USERS

Each individual user can have different functions and you can decide upon which email notifications you want the system to send you.

Users who work for multiple companies no longer require different email addresses. They can be assigned to multiple accounts.

:SHORTCUTS

There are keyboard shortcuts to assist you with navigating through each window.

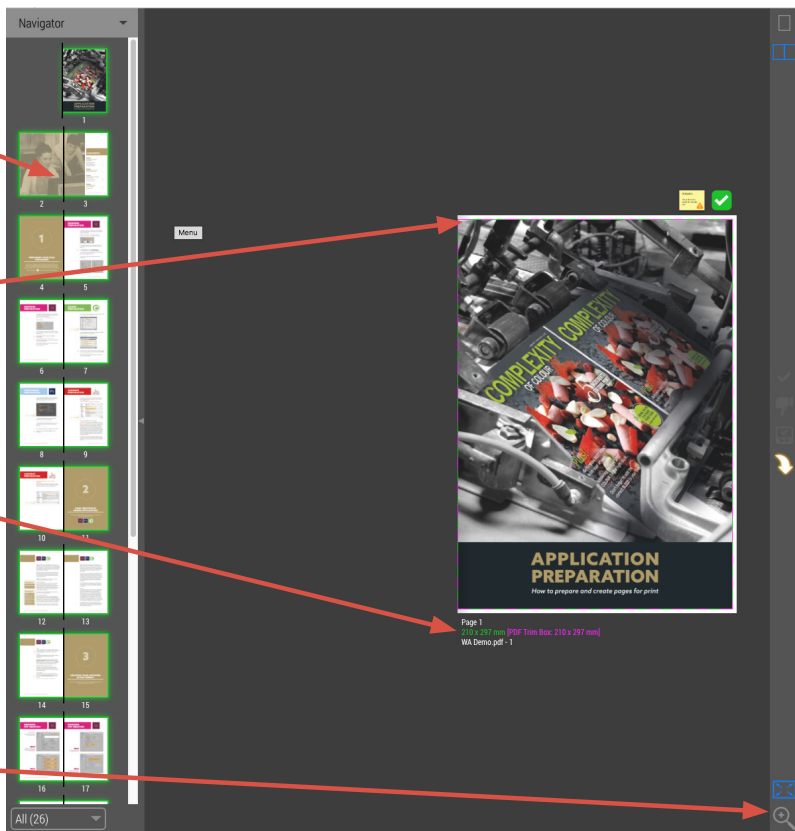

:NAVIGATION

The Navigation pane allows you to view spreads as well as single pages.

Trim box displays where the page will be trimmed, allowing you to see if the page has adequate bleed.

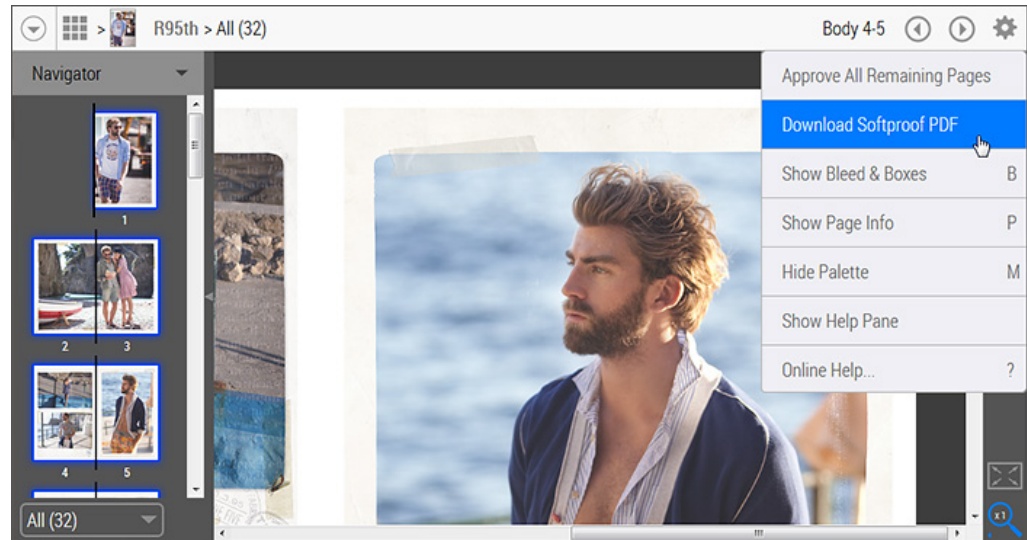

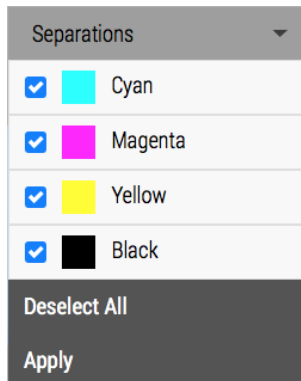

Page Info boxes show the trim size of the PDF, another check to see if it has been supplied to the correct dimensions.

The zoom function no longer opens a separate window overlay. On tablets and smartphones, users can change the zoom level by pinching.

:COLOUR SEPARATIONS

Users can validate versioning enabling language changes or priced/unpriced jobs to be fully automated and approved. Or see separations to check black overprints or spot color usage.

:PROOFING OFFLINE

Pages can also be downloaded for offline verification and printing. This eliminates the cost of delivering hardcopy proofs. Once a user has checked all the pages offline, he or she can approve them with a single click.

:ADDING REMARKS

Internal-Company Collaboration is also improved. Users can add remarks to jobs or to pages. They can indicate which design element a remark refers to.

...and of course, it is now **usable across all platforms**
so you could finish approving your job on the way
home rather than stay late in the office!

***We are excited about this update
and hope you are too!***
